| **Subject:** | Complaint/Inquiry Task 6 XDD |

To Championship Director Sam Parks:

I am writing to request a review of my no result on Task 6. I requested a reason for my no result from the scoring team and was told I received a no result because 'the declaration for 6 was invalid as it wasn't at the intersection of 2 gridlines.'

I then provided a screenshot of the task sheet showing what a valid goal declaration was clarified as on the task sheet, this is attached to this email.

The verbiage:
 'any grid line intersection on OR North of Gridline 8600
 4X4 Coordinate'

clearly states that a 4X4 Coordinate North of gridline 8600 is a valid declaration. This is ambiguous at best and allows for ANY 4X4 coordinate to be used.

I respectfully ask that my declaration and result from task 6 be counted how the task was written and for any further technically difficult task to include examples of how the coordinates should be written and a diagram of the intent of how the task is to be flown.

Thank you-

Nick Donner
