

## Anti-doping and alcohol policy

For the 2023 Australian National Ballooning Championships, World Anti-Doping Agency (WADA) rules concerning anti-doping, including alcohol abuse, will be applied.

Intoxicated crew, including pilots, will be ordered to stop whatever ballooning activity they are currently participating in.

The Safety Officer can take whatever action he feels appropriate and should immediately inform the Event Director.

If there is need for independent documentation, medical treatment or if otherwise deemed necessary, police or emergency services will be asked for assistance.

If you are using a drug that is on the WADA list of “Prohibited Substances and Methods” but is prescribed by a medical doctor, **you must have the relevant documentation demonstrating that you have an official therapeutic use exemption (TUE)**. In such a case, please report this to the Event Director (Gary Lacey).

The latest WADA list of “Prohibited Substances and Methods” is available from the Electronic Notice Board.

Note:

1. The legal blood alcohol limit for [driving in Western Australia](#) is 0 - 0.05g/100ml.
2. The legal blood alcohol limit for flying in Australia is 0g/100ml.
