#### SPECIAL NOTES

- The large lake about 2km x 10km in diameter. Be cautious about the wind speed and direction and take extra care in your calculations. There is another similar lake further west.
- South-easterly and South-westerly wind directions will take you parallel to the lake and river and bordering forest areas which can be challenging to find landing spots. Be sure to stay clear of those directions.
- 15km southward is the start of a mountain range with scarce landing spots. Be sure to land well before them in the valley.
- 10km northeast of Prelog is the Hungarian border. **DO NOT cross the border!** Be sure to land before the forested area around the Mura River which is the border.
- North of Prelog there is a major powerline that branches westward, northward, and eastward. Take note of it on the map and exercise caution.
