

Complaint competitor #35 Uwe Schneider

In task 32 ELB I got no result, because my 2nd leg was 8s too short.

The limits of the legs in ELB tasks are normally given in distances. Infringement of the distances will be considered as relative infringement and penalized according to rule 13.3.6 with 2 task points per 0,1% infringement.

In this rule the ELB task is explicitly mentioned.

Also in the COH it is written in the tips for task setting under 3.2.1:

Define the leg length in km and not in time.

In task 32 the limits of the legs were defined as time limits. And apparently the time limits were taken as absolute limits.

I herewith ask to penalize the leg infringements in task 32 in the classic way as relative infringements and penalize them with 2 task points per 0,1% infringement.

Uwe Schneider
