The Jury was requested to review a scoring issue where the value of P used in the formula was incorrect. This appears to be an issue that occurred when two competitors dropped out of the event and while reflected in some areas, was not reflected in the P value used in the scoring calculations.

We, as the jury, reviewed rules 5.3.2 and 14.3.3, to determine if the jury had the authority to make a change after task scores had posted as final, but before the approval and signing of the final scores (14.3.3). The jury determined that the jury had the authority to make a correction in the P value.

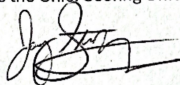

After review of the circumstances, the jury's unanimous decision is that the value of P is a correctable error and the scores should be recalculated for the appropriate value of P.

Respectfully submitted,

Sean Askren – Jury President as the Chief Scoring Officer recused himself (Rule 4.3.3)

Joey Strutz – Jury member

Al Nels – Jury member
