Object: Complaint about Task n. 8

Dear Event Director

We hereby contest the result applied to Task n.8, for the following reasons

The Flight 3 TDS clearly states in bold that "**The result is the ratio of the 3D-distance (in m) from the mark to nearest declared goal divided by the distance (in Km) between the declaration point and the goal.**"

Currently my result does not show the nearest distance between my marker and the declared goal.

After publishing the provisional results, during the morning briefing, the director admitted "**that due to an error on my part, the wrong results were published and that immediately after the briefing I will publish the correct data**" - official 1, so it was.

Then the previous results were published again - official 2/Final, this time without saying anything.

In this new ranking my result is not the nearest distance between my marker and the declared goal, as specified in TASK n. 8.

I therefore ask that my result be corrected, based on what is required by TASK 8

Many Thanks in advance

Raffaele Moscara
