

Questions and answers

On task sheet flight 3

Question from David Strassmann:

#6 means, you must [be] closer than 200m to Loggergoal1 to start the LRN? What is if you are outside?

Answer (15.06.2021)

If you are outside the 200m of the coordinate declared in loggergoal#1, you can not achieve a valid mark for point A, thus you can not start your LRN.

Be aware that in this task you can redeclare, if you have not started your LRN.
